“ John was easily one of the nicest, smartest and fun person to be around that I have ever known! I worked with John at the Burlington Generating Station until 1993 when I moved to Florida. I still think of him often.

Mr. Molnar was a great person. As a kid living on Potts Mill Rd., he was always around to help out and I personally learned a lot from how handy he was. One time I remember him coming down to our house and hooking up an electrical outlet for me. I watched him every step of the way as he explained to me how to do it. That's the type of person he was.

Thoughts and prayers with the Family.
